

CHRISTIAN JAY JAVAL

Sr. Software QA Analyst

 christian.javal@gmail.com  [linkedin.com/in/jayjaval](https://www.linkedin.com/in/jayjaval)  github.com/cjayjaval  cjayjaval.github.io

PROFESSIONAL SUMMARY

- Nearly 12 years of experience in Software Testing and Quality Assurance across Web, Desktop and Mobile apps
- 2 years of experience as a System Analyst with strong background in requirement analysis
- Transitioning into QA Automation through self-learning Playwright with personal end-to-end projects
- Experienced in Agile development, regression testing, defect management and cross-functional collaboration
- Experienced in creating testing documentations (Test reports, Functional requirements, User manuals)
- Responsible for onboarding newly hired QAs and introducing them to team workflows and testing processes

TECHNICAL SKILLS & TOOLS

- **Testing:** Functional testing, Regression testing, Integration testing, Smoke & Sanity testing, Exploratory testing, UI/UX testing, Web, Desktop & Mobile App testing, UAT
- **Test Automation:** Playwright, JavaScript, End-to-End UI Automation, Page Object Model (POM)
- **Tools & Platforms:** Jira, Git/GitHub, Visual Studio Code, Figma, Trello, Google workspace, MS Office, Slack

PERSONAL AUTOMATION PROJECTS (Playwright + JavaScript)

Playwright E-commerce Automation

Link: github.com/cjayjaval/playwright-ecommerce

- Developed an end-to-end UI automation project covering login, product selection, cart validation, checkout, coupon application, order placement, and order history verification
- Implemented the Page Object Model to separate page-specific locators and actions from test flow
- Used environment variables for sensitive credentials and centralized reusable test data
- Implemented assertions to validate product details, pricing, checkout flow, and order history

Playwright Event Booking Automation

Link: github.com/cjayjaval/playwright-event-booking

- Developed end-to-end UI automation covering event creation, event listing verification, booking confirmation, and seat availability updates using assertions
- Implemented dynamic test data to ensure unique event names on every execution
- Applied the Page Object Model to improve test organization and maintainability.

WORK EXPERIENCE

Sr. Software QA Analyst

June 2025 - May 2026

Anagenesis Inc.

Projects: Games integration for Web and Mobile app, CMS

- Reviewed BRDs, created test cases, and validated new features before production release
- Collaborated with Business Analysts and Developers to clarify requirements and verify defect fixes
- Performed functional, regression, and end-to-end testing for web and mobile gaming platforms
- Logged, tracked, and validated defects using Jira across UAT, Staging, and Production environments
- Validated CMS configurations, promotions, reports, rebates, and game integrations

WORK EXPERIENCE

Sr. Software QA Analyst

June 2022 - June 2025

Cybilltek Software Inc. (CSI)

Projects: Games integration for Web and Mobile app, CMS

- Worked as a Senior QA for 3 years until the company ceased operations, then was rehired under the same leadership when it relaunched as Anagenesis Inc., continuing in the same role and on the same project

Sr. Software QA / System Analyst

May 2019 - June 2022

Bonfire Technologies and Solutions Corp.

Projects: Inventory system, Payroll system, Kiosk Ordering system, Barangay services app

- Served as both QA Engineer and System Analyst for multiple business applications
- Gathered requirements and created Functional Requirement Documents and System Specifications
- Designed system mockups to visualize proposed features
- Designed test cases and validated implemented features against business requirements
- Participated throughout the Software Development Life Cycle from requirements gathering, System design to testing and deployment

Software QA Engineer III

June 2017 - May 2019

Nelsoft Systems Inc. (NSI)

Projects: Inventory system, POS

- Performed manual testing for web and desktop POS applications
- Executed integration, system, regression, and end-to-end testing
- Created data-driven regression test scripts using the company's internal automation tool

Sr. Assistant Software QA Engineer

Jan 2016 - Mar 2017

Advanced World Solutions Inc. (AWS)

Projects: Engine Control Unit source code testing

- Performed white-box unit testing using client source code and specifications
- Created test patterns derived from the specification document
- Executed test patterns to analyze expected versus actual results using an internal automation tool
- Performed peer reviews and cross-checking, re-validating colleagues' test results

Quality Assurance Engineer II

Aug 2014 - Dec 2015

Alsons/AWS Information Systems Inc. (AAISI)

Projects: Engine Control Unit source code testing

- Started as a Whitebox Tester through an outsourcing company, then was later absorbed directly into their partner company, Advanced World Solutions Inc., retaining the same role and responsibilities

EDUCATION

Bachelor of Science in Information Technology

May 2014

Polytechnic University of the Philippines (Sta. Mesa Manila)
