

SOFTWARE QA ENGINEER | SOFTWARE TESTER

CHRISTIAN JAY JAVAL

Philippines | christian.javal@gmail.com | [LinkedIn](#) | [Digital Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

- Nearly 12 years of experience in Software Testing and Quality Assurance across Web, Desktop, and Mobile applications.
- 2 years of experience as a Business / System Analyst with a strong background in requirements analysis, functional specifications, and SDLC participation.
- Experienced in functional, regression, integration, exploratory, UAT and end-to-end testing.
- Experienced in Agile development, defect management and cross-functional collaboration.
- Experienced in creating test cases, test reports, functional requirements, system specifications, and user manuals; also supported onboarding of newly hired QAs.
- Building QA Automation skills through Playwright and JavaScript, with personal end-to-end automation projects using Page Object Model (POM).

TECHNICAL SKILLS & TOOLS

Testing: Functional Testing, Regression Testing, Integration Testing, Smoke & Sanity Testing, Exploratory Testing, End-to-End Testing, UAT, UI/UX Testing, Web, Desktop & Mobile Testing

Test Automation: Playwright, JavaScript, Page Object Model (POM), End-to-End UI Automation

Basic Knowledge: SQL, API Testing with Postman, TestRail

AI Tools: ChatGPT, Claude, LLM-assisted development and testing

Tools & Platforms: Jira, Git/GitHub, Sourcetree, Visual Studio Code, Figma, Trello, Google Workspace, MS Office, Slack

PERSONAL PROJECTS

PLAYWRIGHT E-COMMERCE AUTOMATION | [GitHub link](#)

- Developed an end-to-end UI automation flow covering login, product selection, cart and pricing validation, checkout, coupon application, order placement, and order history verification.
- Applied Page Object Model, environment variables for sensitive credentials, centralized reusable test data, and assertions for key business flows.

PLAYWRIGHT EVENT BOOKING AUTOMATION | [GitHub link](#)

- Developed end-to-end UI automation covering event creation, event listing verification, booking confirmation, and seat availability updates.
- Used dynamic test data to ensure unique event names for test script repeatability and applied Page Object Model to improve organization and maintainability.

JOBTRACK AI — AI-POWERED JOB APPLICATION TRACKER | [GitHub link](#) | [Live Demo](#)

- Built a web-based job application tracker with application management, search, filtering, sorting, form validation, and local data persistence.
- Integrated AI-powered resume-to-job matching to identify matched, partial, and missing job requirements; applied QA practices throughout development by testing workflows, edge cases, and AI response consistency.

WORK EXPERIENCE

SENIOR SOFTWARE QA ANALYST

Jun 2025 - May 2026

Anagenesis Inc.

Systems: Games integration for Web and Mobile apps, CMS & Back Office

- Reviewed BRDs, created test cases, and validated new features before production release.
- Performed functional, regression, and end-to-end testing; logged, tracked, and validated defects using Jira across UAT, Staging, and Production.
- Validated CMS and back office configurations, promotions, reports, rebates, and game integrations.
- Worked with cross-functional teams throughout Agile development cycles; collaborated with Business Analysts and Developers to clarify requirements and verify fixes.
- Onboarded and mentored newly hired QAs and introduced them to team workflows and testing processes.

SENIOR SOFTWARE QA ANALYST

Jun 2022 - Jun 2025

Cybilltek Software Inc. (CSI)

Systems: Games integration for Web and Mobile apps, CMS & Back office

- Performed senior QA responsibilities for the same gaming platform and CMS project, including feature validation, regression testing, defect tracking, and release support.
- Worked with cross-functional teams throughout Agile development cycles and used Jira for defect management.
- Continued in the same role when the company ceased operations and relaunched as Anagenesis Inc.

WORK EXPERIENCE - CONTINUED

SENIOR SOFTWARE QA / SYSTEM ANALYST / BUSINESS ANALYST

May 2019 - Jun 2022

Bonfire Technologies and Solutions Corp.

Systems: Inventory & Sales, Payroll, E-commerce, Barangay Services applications

- Served as both QA Engineer and System Analyst for multiple business applications
- Gathered and analyzed requirements; created Functional Requirement Documents, system specifications, system mockups, and user manuals.
- Designed test cases and validated implemented features against business requirements throughout the SDLC, from requirements gathering and system design to testing and deployment.
- Performed manual testing across web and desktop applications, including integration, system, regression, UAT.
- Performed basic API testing and database validation.

SOFTWARE QA ENGINEER III

Jun 2017 - May 2019

Nelsoft Systems Inc. (NSI)

Systems: Inventory & Management system, POS

- Performed manual testing for web and desktop POS applications, including functional, exploratory, integration, system, regression, and end-to-end testing.
- Created data-driven regression test scripts using the company's internal Nelsoft Automation Tool.
- Created and tracked defects using Mantis Bug Tracker and Trello.
- Used Sourcetree as part of the team's source-code repository workflow.

SENIOR ASSISTANT SOFTWARE QA ENGINEER

Jan 2016 - Mar 2017

Advanced World Solutions Inc. (AWS)

Systems: Engine Control Unit source code testing

- Performed white-box unit testing using client source code and specifications.
- Created test patterns from specification documents and executed them using the internal winAMS automation tool to validate expected versus actual results.
- Performed peer reviews and cross-checking, re-validated other QA's test results.

QUALITY ASSURANCE ENGINEER II

Aug 2014 - Dec 2015

Alsons/AWS Information Systems Inc. (AAISI)

Systems: Engine Control Unit source-code testing

- Started as a Whitebox Tester through an outsourcing company and was later absorbed by partner company Advanced World Solutions Inc., retaining the same role and responsibilities.
- Performed source-code-based unit testing and validation using the same ECU testing process and winAMS internal automation tool.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Jun 2009 - May 2014

Polytechnic University of the Philippines, Sta. Mesa, Manila
